

## WiseFish

### WiseFish 6.0 for the Fishing Industry

WiseFish 6.0 is affordable, integrated software for the fishing industry. Instill customer confidence by capturing complete catch information, including special handling, catch area and size, all integrated with trip costs.

- Vessel and Vendor Management** Maintain a vessel registry for each vessel in the managed fleet, including port of landing, fishing area and fishing equipment. Fishing trips of boats from other organisations can also be tracked and catch automatically transferred to a purchase order for a comprehensive overview of the entire supply chain.
- Real-Time Data** Allocate and track catch for production planning in real-time before settling the trip. Catch lines, once entered, can be immediately visible in the system before landing the trip.
- Catch Recording** Results of each fishing trip are easily recorded as journal-style line entries. Catch information can be viewed by species, fishing area, size and quality grading etc. Perform size assessments, sample evaluations and link quality evaluations for each lot back to the vessel.
- Crew Settlement** Retain the crew roster and calculate the settlement for each vessel and trip, including complete costing of all trip expenses and management of company defined premiums.
- Catch Sales** Landed catch can be posted immediately into inventory, sold between departments and/or linked to market prices.

## WiseFish

- Trip Costs** Fully assign all associated trip costs and integrate them into your accounting and costing data.
- Quality Control** Any quality inspections associated with the trip are retained and can be quickly identified from the vessel/lot level through to production and sale.
- Environmental Traceability and Eco-Harvesting** Special equipment and quality measures can be recorded along with the catch line and area, providing full documentation to satisfy environmental certification records and quality buyer schemes.
- EU/UK Regulatory Reporting** Record keeping standards and retention regulations are easily met as part of the natural workflow.
- SFIA Reporting** Full record-keeping and reporting standards. Where available, can be delivered electronically.
- Traceability** Attain end-to-end traceability and transparency along the whole supply chain.
- MS Outlook, Word, and Excel Integration** WiseFish 6.0 is built on Microsoft Business Solution's Dynamics NAV, providing the power and reliability of a world class accounting and ERP system and ensuring seamless integration with all familiar Microsoft applications.
