

WiseFish

WiseFish 6.0 for Seafood Traders

WiseFish 6.0 shines in fast paced seafood sales operations. From one-screen inquiry on the order for inventory available to promise to automated shipping time calculations built in to the delivery date estimate, these tools are indispensable in meeting rigorous buyer requirements of today's seafood market.

Customer and Vendor Management

Maintain complete customer and vendor records including purchase history, place of delivery information and currency calculations. Customer credit limits, outstanding orders and account balance information flow seamlessly into sales documents. Thus assisting sales people and purchase staff to make informed decisions.

Pricing

Price products by a fixed price list or price by individual customers or groups of customers. Automatically discount for volume purchases or early payment. Price defaults into sales documents and can be enforced or overridden according to user permissions.

Integrated Production and Procurement Tools

Create production or purchase orders directly from a sales document to ensure that customer needs are always met while minimising expensive security zone stock.

Documents

Manage complex export documents. Create all necessary shipping documentation automatically when the order is processed, from the bill of landing to the proforma invoice and CITES certificate

Integration with Warehousing and Transport Operation

Reduce costly manual processes and paper trails and their associated delays. Automate packing, picking, staging and shipping direct from the order. Transport functions easily handle a variety of shipment operations, including single order or consolidated, multi-modal or multi-destination shipments, container loading and trip scheduling and routing.

WiseFish

- E-Commerce** System-wide EDI (Electronic Data Interchange) tools allow you and your customers to easily buy, sell and trade information as well as alert staff of transactions in a secure web-based environment.
- Sales and Profit Analysis** Accurately track and allocate all costs associated with the sale and distribution of a product including shipping, outside storage, finance, handling and loading fees, third party accruals and currency exchange gains and losses.
- Quality Control** Manage risk with full quality reporting and document retention at every stage to satisfy the most thorough external audit.
- Traceability** Attain end-to-end traceability and transparency along the whole supply chain.
- EU/US Regulatory Reporting** Record keeping standards and retention regulations are easily met as part of the natural workflow.
- SFIA Reporting** Full record-keeping and reporting standards. Where available, can be delivered electronically.
- MS Outlook, Word and Excel Integration** WiseFish 6.0 is built on Microsoft Business Solution's Dynamics NAV, providing the power and reliability of a world class accounting and ERP system and ensuring seamless integration with all familiar Microsoft applications.
