

# PROTECTING YOUR DATA, PROTECTING YOUR BUSINESS

## How safe is your vital information?

What if your data was stolen? Or if confidential information was passed on to your competitors? Even if you have security measures in place you could still become the victim of a data breach, costing you time and money.

Managed Security helps to protect your systems, minimize data theft and safeguard your business by:

- Monitoring security of your systems
- Analysing risks & threats
- Producing regular reports
- Running anti-virus software
- Protecting your email
- Offering consultancy support & advice
- Developing guidance & policies
- Testing your systems against hacking

We take away the worry of data theft, leaving you to concentrate on growing your business and increasing your revenue.

## The Solution

We will monitor your systems, administer your protection and help plan your strategic approach to data security. 24/7

Managed Security consists of three services:

Systems Monitoring	Administration	Consulting
Anti-virus	Email protection	Audits & strategic advice
Systems scanning	Malware prevention	Guidance & policy
Early warning signs of threats	Software security updates	Strategic security improvements

Systems monitoring takes a comprehensive look at your current systems and spots any threats – fast. Next, administration lets us manage all your security measures and keeps them up to date. And for total protection, our strategic consultancy services work with you in partnership to maximise the protection of your data.

## What does it cover?

- IT systems security
- Hacking
- Policies & guidance
- PC and laptop protection
- Malware prevention
- Email systems
- Data confidentiality

## What can you expect from each service?

Service	What it does	Benefits
Systems Monitoring	Checks anti-virus measures	Highlights issues & threats early on
	Monitors threats & security incidents	Builds up a picture of systems' security
	Scans systems	Step towards making your data more secure
	Produces regular reports	
Administration	Malware protection	Keeps data accessible & safe
	Email security	Provides the latest protection
	Security updates	Removes the stress of data attacks
	Testing	Frees up valuable IT resources
	Produces regular reports	
Consulting	Strategic advice	Complete peace of mind about data security
	Hack testing	Comprehensive testing of defence systems
	Guidance & policies	Action plan to build up protection
	Produces regular audits, reports & recommendations	Unified company-wide approach to data protection
